**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/30/2007 has been entered.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Wallace et al. (U.S. 6,322,576).

Note in figures 3-5, a member forms a series of at least four successive loops, wherein each loops having a different axis and lying in a separate plane from any other loop; at least two non-successive loops lying in respective planes which are substantially parallel; and wherein each plane forming an angle greater than 30 degrees with any immediately proceeding and any immediately succeeding plane; and furthermore, wherein the loops can be wounded in clockwise or

counterclockwise direction and having a diameter smaller than a diameter of an immediately preceding loop.

***Response to Arguments***

Two non-successive loops

Applicant's arguments filed 10/30/2007 have been fully considered but they are not persuasive. Applicant's arguments with respect to claim 1 has been considered but are moot in view of the new ground(s) of rejection.
